EDUCATION

University of Florida

August 2024 – Present

Bachelor of Science in Computer Science (GPA: 3.77)

Gainesville, FL

- Relevant Coursework: Operating Systems, Data Structures and Algorithms, Intro to Software Engineering, Discrete Math
- Honors: Dean's List (Fall 2025, Spring 2026), Bright Futures Scholarship
- Estimated graduation date: August 2027

EXPERIENCE

Trib Total Media

May 2026 – July 2026

IT Department Intern

Tarentum, PA

- Contribute to development and optimization of the DataFusion adtech platform (data-fusion.io).
- Wrote an automated BATS (Bash Automated Testing System) suite for an audience-segmentation repository, with 11 test cases run in a Docker-based environment.
- Refactored the Bash-based segmentation tool to eliminate substantial code duplication and improve maintainability.
- Created and analyzed SQL report scripts for subscriber information, working with available vendor data and investigating data limitations.

Self Employed Contractor

June 2024 – Present

Mathematics Tutor

Remote

- Teach math to students, adapting explanations to each student's level; previously taught foundational Python.
- Helped a student raise their Pre-Algebra grade from an F to a B over 5 months.

ENGIN

June 2021 – June 2022

Speaking Partner (Volunteer)

Remote

- Led weekly English-speaking sessions with a Ukrainian partner to build their fluency and confidence.

PROJECTS

GoTutor.ai | github.com/anonymous-basenji/gotutor-ai

- Building a supervised tutoring AI with a React/TypeScript frontend and Node.js/TypeScript backend, adding RESTful API endpoints to consolidate Supabase logic for sensitive operations.

TownVoice | github.com/edaraish/CEN3031CivicProject

- Frontend Developer
- Collaborated on a civic engagement web app in an Agile team, building interface features in React.
- Built modular components for announcements, community boards, and petitions, integrating with ASP.NET REST APIs.

Data AI Assistant | github.com/anonymous-basenji/data-ai-assistant-ultra

- Built an AI chatbot emulating Lt. Cmdr. Data from Star Trek, with a Node.js/Express backend that streams responses from Google's Gemini API to a React frontend, deployed on Vercel.
- Used custom prompt engineering to keep character responses consistent.

Moticom | github.com/anonymous-basenji/moticom

- Designed the architecture for a productivity time-tracking PWA and directed an AI coding agent (Google Antigravity) to implement it from those specs.

SKILLS & INTERESTS

Languages: JavaScript, TypeScript, React with TypeScript, Node.js, Bash, C++ , HTML/CSS, SQL (Prior experience: Python, Java, React.js)

Tools & Concepts: Git & GitHub, RESTful API Design, Google Antigravity, Bats (Bash Automated Testing), Firebase, Linux/Unix, Agile Development, Data Structures & Algorithms

Spoken Languages: English, Spanish (Golden Seal of Bilingual), Russian

Interests: AI Development & Applications, Local LLM Deployment, Cybersecurity
